

# Arbor T & O

## Arbor T & O

Arbor T & O provides the soil with all the ingredients necessary to reestablish the natural and productive relationship between soil and plants. The product has many components of various quantities combined after four separate brewing processes. This includes humates, fish, Fulvic acid, and all of the known essential micro and macro nutrients. It is developed specifically for soils deficient in fungi, or crops in production with a demand of a higher number of fungi. Included are several genera of aerobic bacteria, fungi, and soil organisms. All of them are native to a healthy soil.

***Soil Restoration LLC's mission is to develop and market products that restore and enhance the soil's nutritional balance. The beneficial application of our organic based products increases both the quantity and quality of crops. It is non-polluting and will ultimately improve the quality of human health in our world.***

### Use Arbor T & O for:

- Increased Crop Yield
- More Porous Soil
- Improved Water Absorption
- Increased Water and Nutrient Holding Capacity
- Increased Bushel Weights
- Natural Green Lawns
- Higher Sugar Content In Fruit and Vegetables
- Delicious, Flavorful Fruit
- Larger, Heavier Nut Crop

*The product greatly influenced the growth of the plants. The treated part of the field had a pod count of 90 or more, while the untreated part of the field had an average pod count of 61. The treated portion of the field averaged more than one seed per pod than the untreated portion. **Arbor is recommended to all gardeners, landscapers, and farmers.***
